Ability to endure any circumstances with the right motivation while always looking to take the extra step that makes the difference. Very skilled at problem solving and high levels of creativity.

---

## Skills

JavaScript, HTML, CSS, Tailwind, Spring Boot, Angular, Svelte, Vue, MySQL, Java, Project Management, Teamwork.

---

## Projects

- Tech Jobs Database: During this project we developed an application that can take in user input to create a database of Tech Jobs, with the functionalities of searching and filtering the database. The technologies used were Java, CSS, HTML, Thymeleaf and MySQL.
- aPPets: Currently I am working on a personal project with the objective of providing a new platform of social media dedicated to pets. During this project I will be using JavaScript, Tailwind, MySQL, Vue, HTML and CSS

---

## Education

DECEMBER 2019

**GED / NWACC, Rogers - Arkansas**

OCTOBER 2020 – APRIL 2021

**LC 101 Boot Camp / Launch Code, North West Arkansas**

---

## Experience

NOVEMBER 2019 – PRESENT

**Draftsman - Estimator / Boat Dock World, Rogers – Arkansas**

In my current role I was able to improve the quality of the designs and establish a standard for the construction process of these new projects. The biggest challenge I had to face is not having the necessary knowledge to fulfil my position, this led me to learn how to endure pressure and being in a constant learning curve until I felt comfortable with the results of my work.

To this current day I am still working on organizational improvements within the company such as stock control, scheduling and migrating processes to digital platforms.
